@anshukumar172

Technical Skills

Programming & Frameworks: Python, C++, FastAPI, Streamlit
Data Manipulation & ML: Pandas, NumPy, Scikit-learn, LangChain, NLP, Statistics, Machine Learning
Databases & Querying: SQL, MySQL
APIs & Cloud Services: REST APIs, OpenWeatherMap, Google Places
Data Visualization & BI Tools: Matplotlib, Seaborn, Tableau, Power BI

Experience/Projects

Smart Assistant for Research Summarization

- **Built a FastAPI backend integrating Groq's LLaMA3 (8B) model** to summarize, interpret, and generate logic-based questions from PDFs and TXT files, handling up to **8,000 characters per document** efficiently.
- **Engineered 4 key AI-driven endpoints** (summarization, Q&A, question generation, evaluation), achieving **>90% JSON response accuracy** using structured prompt formats and schema validation.
- **Reduced manual document review time by 70%** through automated NLP tasks (text extraction, summarization, and evaluation), enabling faster comprehension and learning from complex documents.
- • Integrated with a **Streamlit interface** to allow real-time document uploads and interactive AI responses, improving user experience for researchers and students.

AI Trip Planner

- Built an **AI-powered travel planner** using **FastAPI and Streamlit for generating personalized trip itineraries** and **budgeting**.
- Developed and integrated **5+ modular Langchain tools** for **currency conversion, expense calculation, place search,** and **weather forecasting**, improving **travel recommendation accuracy by 30%**.
- Implemented **fallback mechanisms** using multiple APIs (**Google Places, Tavily, OpenWeatherMap**) ensuring **99% uptime** and reliable data retrieval under varied conditions.
- Designed an **interactive user interface** with **real-time AI-generated plans**, reducing **user planning time by 40%** through automated **itinerary creation** and **expense estimation**.

Online Courses Analysis

- **Analyzed** 50,000+ recorded lectures from leading **EdTech platforms**, uncovering category-wise **trends** to optimize course offerings.
- Built an interactive **Power BI** dashboard to visualize **course distribution**, **viewership patterns**, and **skill demand**.
- Performed **NLP**-based **skill extraction** and analyzed 1M+ **engagement data** for strategic content planning.
- Discovered that courses with **subtitles** received **23% higher viewership**, providing **recommendations** to improve platform **accessibility**.

CERTIFICATIONS & TRAINING

- Complete Machine Learning, NLP Bootcamp MLOPS & Deployment by Krish Naik (Udemy).
- Data Analysis with Python (IBM, Coursera).
- Python for Data Science, AI & Development (IBM, Coursera).

Education

Noida Institute of Engineering & Technology |Greater Noida **2022 – 2026**
B.TECH COMPUTER SCIENCE AND ENGINEERING (DATA SCIENCE)
